

Amendments to the Claims:

This listing of claims replaces all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A transaction device for interfacing with a user comprising:
 - a. a context data module for capturing and distributing context data wherein the context data module is configured to automatically capture the context data in response to a user input for an unrelated request; and
 - b. a storage device connected to the context data module for storing the context data.
2. (original) The transaction device according to Claim 1 further comprising an interface connected to the context data module for receiving a pre-selected distribution preference from the user.
3. (original) The transaction device according to Claim 2 wherein the context data module distributes the context data in response to the pre-selected distribution preference.
4. (original) The transaction device according to Claim 1 further comprising an interface connected to the context data module for receiving a pre-selected context data preference from the user.

5. (original) The transaction device according to Claim 4 wherein the context data module captures the context data in response to the pre-selected context data preference.

6. (original) The transaction device according to Claim 1 wherein the context data includes personal contact information entered by the user.

7. (original) The transaction device according to Claim 1 wherein the context data includes personal financial information entered by the user.

8. (original) The transaction device according to Claim 1 wherein the context data includes website visitation history of the user.

9. (currently amended) A method comprising:

- a. automatically capturing context data on a transaction device through responding to a request from a website;
 - b. storing the context data on a storage device; and
 - c. distributing the context data from the storage device to a remote location,
- wherein the request from the website is independent from storing the context data on the storage device.

10. (original) The method according to Claim 9 wherein the context data includes personal contact information entered by a user.

11. (original) The method according to Claim 9 wherein the context data includes personal financial information entered by a user.

12. (original) The method according to Claim 9 wherein the context data includes a website visitation history of a user.

13. (original) The method according to Claim 9 wherein the remote location is a website.

14. (original) The method according to Claim 9 wherein the remote location is a transaction privacy clearing house.

15. (original) The method according to Claim 9 wherein the storage device is within the transaction device.

16. (original) The method according to Claim 9 wherein the storage device is outside the transaction device.

17. (original) The method according to Claim 9 further comprising pre-selecting the context data for distribution.

18. (currently amended) A method comprising:

- a. visiting a website;
- b. automatically capturing context data on a transaction device in response to visiting the website wherein the context data is an address of the website ~~a user input;~~ and

[[b.]] c. receiving the context data in a remote location thereby obviating a redundant user input of the location of the website.

19. (original) The method according to Claim 18 further comprising pre-selecting the context data for capturing.

20. (canceled)

21. (canceled)

22. (currently amended) A computer-readable medium having computer executable instructions for performing a method comprising:

- a. automatically capturing context data on a transaction device through responding to a request from a website;
 - b. storing the context data on a storage device; and
 - c. distributing the context data from the storage device to a remote location ,
- wherein the request from the website is independent from storing the context data on the storage device.

23. (original) The method according to Claim 22 wherein the remote location is a transaction privacy clearing house.

24. (original) The method according to Claim 22 wherein the storage device is within the transaction device.

25. (original) The method according to Claim 22 wherein the storage device is outside the transaction device.

26. (original) The method according to Claim 22 further comprising pre-selecting the context data for distribution.
